Abstract (en)

A fastener for a closure is provided which has a fastener body 22 for attachment to the closure and a pivotal shaft 24 extending through the fastener body 22. The shaft 24 has a first end located on one side of the fastener body, and a second end located on a second side of the fastener body so that the second end extends in a direction away from the closure. The first end is profiled to drive one or more latches to secure the closure; and the second end is provided with a taper for receiving a handle thereon.
