Abstract (en)

To provide an outdoor unit of a refrigeration apparatus that is not susceptible to an effect of metal corrosion in an outdoor unit of a refrigeration apparatus using a heat exchanger made of aluminum or aluminum alloy. An outdoor unit (20) of an air-conditioning apparatus (1) according to the present embodiment comprises a heat exchanger (25) made of aluminum or aluminum alloy, a floor frame (8) for mounting the heat exchanger, and a spacer (100) disposed between the heat exchanger and the floor frame. The spacer has an inclined surface (100a) and a horizontal surface (100b). The inclined surface guides condensation from the heat exchanger to the floor frame. The horizontal surface contacts with the heat exchanger and mounts the heat exchanger horizontally.
