Abstract (en)

[origin: US2013193001A1] A cleaning system comprising a liquid source configured to provide a feed liquid, an electrolysis cell configured to receive the feed liquid and to electrochemically activate the feed liquid to provide an electrochemically-activated liquid, where the electrochemical activation also heats the feed liquid such that the electrochemically-activated liquid is heated, and a dispenser configured to dispense the electrochemically-activated liquid.
