Abstract (en)

[origin: WO2013110624A2] The present invention pertains to a method for tracing medicaments administered to an animal, the method comprising operatively connecting a data storage unit to the animal, providing a device for administering the medicament, the device default being in a non-administration mode, establishing that the device has approached the animal to administer the medicament, where-after the device is automatically switched to an administration mode, administering the medicament to the animal with the device, which administering leads to automatically storing information about the administration of the medicament in the data storage unit and switching the device to the default non-administration mode. The invention also pertains to a system for applying this method and a device for using therein.
