Abstract (en)

[origin: WO2013112963A1] An apparatus for receiving a fluid is disclosed. The apparatus comprises an at least partially flexible vessel. The vessel includes a top wall and a plurality of sidewalls, a first of said sidewalls having a first length in a first plane that is greater than a second length of the second, generally orthogonal sidewall in the first plane, and a bottom wall depending from the at least two sidewalls. The vessel may have a generally rectangular cross section, and may include a depending portion. The vessel may be at least partially rigid. Related methods are also disclosed.
