Abstract (en)

[origin: EP2808395A1] Disclosed is the provision of a method for quantifying HDL3 in a test sample without requiring a laborious operation. The method for quantifying cholesterol in high-density lipoprotein 3 comprises allowing a surfactant(s) which specifically react(s) with a high-density lipoprotein 3 to react with a test sample and quantifying cholesterol, and the surfactant(s) is(are) at least one selected from the group consisting of polyoxyethylene polycyclic phenyl ether and polyoxyethylene styrenated phenyl ether.
