Abstract (en)
[origin: EP2808631A2] The invention is a cooling appliance (1) comprising an inner chamber (10) defined by an inner liner (20); a container (30) movably disposed in the inner chamber (10); a support element (40) provided on a bottom wall (32) of the container (30) for carrying the container (30) on the inner liner (20); and a sliding surface (21) on the inner liner (20) where the support element (40) moves on by contacting during the movement of the container (30); and that the support element (40) comprises a contact element (41) being in superficial contact with the sliding surface (21).
