Abstract (en)

[origin: EP2623133A1] An implant matrix comprises mixture of different-degradable polymer, in which nominal resorption of two of the mixture components, which makes up at least 10% of the mixture to differ by factor of 5 or more. Independent claims are included for the following: (1) manufacture of implant matrix; and (2) usage of matrix for colonization with viable cells, and exposing the cells to a predetermined test agent.
