Abstract (en)

[origin: WO2013113726A1] The invention relates to a device for a motor vehicle signal light (1), of the type having built-in light guides (3) and comprising at least one LED (2) as a light source. The device (1) comprises a part (5) made from translucent material, positioned in front of the guide (3) in the direction of travel of the diffused light and provided with graining to provide a light function of uniform colour.
