Abstract (en)

[origin: WO2013113845A1] The invention relates to a fastening system (2), in particular for solar modules (10), comprising at least one support element (4) and at least one rail element (6), wherein the support element (4) has an extent along a first axis (A) and is provided with at least one adjustment section (42), wherein the rail element (6) has an extent along a second axis (B) and has at least one fastening side (62) and at least one connection side (64), wherein the fastening side (62) is provided with at least one accommodating element (66) to which the rail element (6) can be fastened in the adjustment section (42) of the support element (4), and wherein the connection side (64) has a center plane (E) that is oriented parallel to the second axis (B) and extends offset from the center point of the accommodating element (66) by a distance (x).
