Abstract (en)

[origin: WO2013113474A1] A multi-shell wall module for a housing in which a temperature-control tunnel is accommodated comprises a first shell element (28) and a second shell element (30) which are connected together by at least one connecting device (44; 46) such that a wall internal space (36) is formed between the two shell elements (28, 30). The connecting device (44; 46) comprises a thermally insulating connecting member (54). Also specified is an apparatus for controlling the temperature of objects with a housing (12) in which a temperature-control tunnel (14) is accommodated. The housing (12) comprises at least one multi-shell wall module (26) according to one of claims 1 to 9.
