Abstract (en)

[origin: WO2013114005A1] The present invention allows the olfactory identification of the content of a bottle, in particular a wine bottle, or any food container, intended to facilitate the choice of the product by a novice consumer when making his purchase. A support (7), such as a box attached to a bottle and, inside said box, a substance (10) scented with aromas representative of the content of the bottle, help to make the choice.
