Abstract (en)

[origin: US2013196202A1] The invention relates to a method and a corresponding device for producing an electrochemical energy storage cell which exhibits at least one electrode stack (10) and/or electrode coil and a casing (20) at least partially surrounding the electrode stack or electrode coil, respectively, wherein the energy storage cell is at least partially filled with electrolyte (30) and a massaging movement is exerted on the casing (20) which at least partially surrounds the electrode stack (10) or electrode coil.
