Abstract (en)

[origin: EP2810578A2] The invention relates to a shoe system (100), comprising a sole (110) and an interchangeable upper shoe part (120) for receiving a foot of a user, wherein the sole and the upper shoe part are provided with cooperating fastening means for releasable fastening. The fastening means comprise a button closure, comprising a button, an attaching member for attaching the button to the sole and a decorative member (6), wherein the button has an upper side that is arranged to releasably receive the decorative member.
