Abstract (en)  
[origin: EP2810582A1] A head for an oral care implement has at least one tuft extending from a mounting surface of the head. The tuft comprises a first group of filaments having a first length and at least a second group of filaments having a second length wherein the first length is different from the second length. The tuft is inclined with respect to the mounting surface and has an inclination angle between the tuft and the mounting surface from about 65° to about 80°.
