Abstract (en)  
A sheet material comprises a sheet of substrate material (12) having a first surface (16) and a second surface (24). The substrate material (12) comprises a moveable portion (20) having a first edge connected to the remainder of the substrate material (12) and a second edge which is unconnected to the remainder of the substrate material (12). The moveable portion (20) is therefore moveable about the first edge. The sheet material further comprises at least one layer of a shrinkable material (22) provided on the moveable portion (20) of the substrate material (12).
