Abstract (en)

Exterior door or window with exposed wood, which comprises at least one support cell (2) susceptible to be fixed securely to the wall (16) of a building, provided with four or more planks (3) of structural plywood, a substantially quadrangular section with at least two substantially flat main faces (A, A'), parallel to the layers of said plywood, and connected together at least at the ends by means of first fastening means (4) in order to form said support cell (2). The door or window also comprises a shaped frame (5,5'), formed by multiple profiles (6, 6') fixed together in a continuous manner by means of second fastening means (7) on at least one substantially flat main face (A, A') of the planks (3) of said support cell (2), and at least one movable wing (8') mounted on the support cell (2) and susceptible to abut against the corresponding shaped frame (5').
