Abstract (en)

[origin: EP2811499A1] A switch, in particular a battery cutout switch for vehicles and the like, comprising: - a housing (12) carrying at least one pair of fixed electrical contacts (22) and having a tubular neck (42) extending along a longitudinal direction (A), - a contact-holder body (28) carrying at least one movable electrical contact (32) and movable between an open contacts position and a closed contacts position, and - a handle (44) rotatable with respect to the housing (12) about said longitudinal axis (A), between an open position and a closed position, wherein: - said handgrip (48) of the handle (44) has two transverse through-holes (100) opposite to each other; - the tubular neck (42) has an edge (106, 108) facing said handgrip (48) having a first and a second locking seat (110, 112), angularly offset from each other and arranged so that in the open position of the handle (44), one of said through-holes (100) is aligned with the first locking seat (110) and in the closed position of the handle (44) said hole (100) is aligned with the second locking seat (112); and - a separate locking element (114), insertable through one of said through-holes (100) and through the locking seat (110, 112) facing thereto, to lock the handle (44) in the closed position or in the open position.
