Abstract (en)
[origin: WO2013119249A1] A three-dimensional supporting frame includes a blank, including an image receiving surface, a back surface opposed to the image receiving surface, a center portion defining a perimeter, and at least three foldable extensions extending from the perimeter. Each of the foldable extensions includes no less than four folds to be folded toward the back surface to form the three-dimensional supporting frame. An unfilled adhesive is positioned on the image receiving surface at least at the center portion, and a filled adhesive is positioned on the image receiving surface at each of the folds that is furthest from the perimeter.
