Abstract (en)

[origin: WO2013117339A1] The invention relates to an electrical plug connector in the form of a solid contact pin which has the following: A) a contact section, B) a transition section which adjoins the contact section, and C) a connection section, which adjoins the transition section, for electrical connection to an electrical line by means of ultrasonic welding, wherein the connection section has at least one geometric wave refraction element for refracting waves during ultrasonic welding.
