Abstract (en)

[origin: EP2813162A1] A display device for samples of leather, fabric and the like, comprising: - a fixed support structure (14) including a lower base (16), a central column (18) extending upwardly from said lower base (16) and a plurality of circular horizontal shelves (20) fixed with respect to said central column (18) and spaced apart in the vertical direction, - a plurality of cylindrical arrays (12) supported by said base (16) and by said shelves (20), each array (12) being rotatable about said central column (18) independently of the other arrays (12), wherein each array (12) comprises at least two display elements (22) having the shape of a cylindrical sector, each display element (22) comprising a pack (26) of card-shaped samples (36) arranged vertically and oriented in a radial direction with respect to said central column (18).
