Abstract (en)  
[origin: EP2813440A1] A package for a smokeless tobacco product and the use of the package is provided. The package comprises at least one can and a lid, wherein the lid and the can are coupled via a hinged connection. This allows the can and the lid to be swiveled with respect to each other around a swiveling axis in that an access opening of the can is opened and closed. The swiveling axis projects substantially perpendicularly to the access opening.
