Abstract (en)
[origin: US2014361034A1] A dispensing container for flat objects (1), such as boxcutter blades, includes a container body (2) in which is housed a sliding support (3) designed to move between a rear face (4) and a front face (5) of the container, for which the objects are stacked between the sliding support (3) and the front face (5) of the container, the sliding support pushing the objects (1) against the front face under the action of at least one elastic element (6, 6'), the elastic element being designed to pull the sliding support from the rear face to the front face of the container.
