Abstract (en)
Bath salt dispensing device for showers, applicable for being incorporated between a shower tap and hose, the device comprising a receptacle (2) having, at least, one housing (3), suitable for containing bath salts, and having a lid (4) for introduction of the bath salts, and also having, a water inlet (5) and water outlet (6), suitable for coupling to the respective shower tap and hose connections (7), so that it may be incorporated between said tap and said hose while allowing the water to flow therethrough. The water inlet (5) and outlet (6) are disposed on the upper and lower ends of a tubular segment (8) attached to the housing (3) of the receptacle (2), having envisaged a shut-off valve (9) therebetween, which can be actuated by means of a key (10), for controlling the passage or non-passage of water towards the housing (3). The device further comprises a dense mesh (11) in the interior of the housing (3).
