Abstract (en)

A magazine locking structure used in a gun is disclosed to include a locking member (1) mounted in the main gun body (A) behind the grip (A1) and pressable directly to unlock the magazine (B) from the main gun body (A) , a spring-loaded button set (2) mounted in the main gun body (A) in front of the grip (A1) , and a link (3) coupled between the spring-loaded button set (2) and the locking member (1) for moving the locking member (1) to lock or unlock the magazine (B) when the user pushes a press block (21) to shift an actuation rod (22) leftward or rightward in moving a side lug (31) of the link (3) via a push block (23) that is supported between two second spring members (24) .
