Abstract (en)

[origin: US2013209726A1] Disclosed are carpet products comprising at least one substrate and at least one adhesive layer associated with the at least one substrate, the adhesive layer being formed from a latex coating composition comprising (a) a first copolymer of at least a vinyl ester of an alkanolic acid having from 1 to 13 carbon atoms and ethylene; and (b) a second copolymer of at least styrene and butadiene, wherein the first and second copolymers are colloidally dispersed in an aqueous medium comprising a surfactant. The carpet products are particularly durable exhibiting high tuft bind values.
