Abstract (en)  
[origin: WO2013120820A1] The present invention relates to a vehicle (1) with an internal combustion engine (2) which has a crankcase (6) with a crankcase ventilation device (5) which has at least one oil separating device (23) and an oil return (24) which returns separated oil to the crankcase (6), and a conveying device (26) for driving a fluid separated by blow-by-gas. Efficient crankcase ventilation can be realised affordably if the conveying device (26) is additionally used for driving the blow-by-gas in the crankcase device (5).
