Abstract (en)

[origin: WO2013120822A1] The invention relates to an electrical connector (100) intended to link at least one cable (122) to an electrical actuator (1) fixed on a wall (51), the electrical connector (100) comprising at least one first connection part (101), able to accommodate an end of the cable (122), and a second connection part (102), able to lock a position of the electric actuator (1) with respect to the wall (51). The present invention also relates to a heating, ventilation and/or air conditioning installation (50) comprising at least one such electrical connector (100).
