Abstract (en)

[origin: EP2815685A1] A connecting tube portion (12) constituting a suction tool (10) is constituted by at least a first connecting tube (21) connected to a suction tool main body (11) so as to be swingable and a second connecting tube (22) rotatably coupled to the first connecting tube (21). A wheel portion (13) is attached to a lower portion of the second connecting tube (22) via a wheel attaching portion (14). A wheel supporting body (32) is attached to the wheel attaching portion (14) so as to be able to incline using a middle portion of the wheel supporting body (32) of the wheel portion (13) as a fulcrum.
