Abstract (en)

[origin: EP2815989A1] The present invention relates to a package for a smokeless tobacco product comprising a can, a cap and a lid, wherein the cap is provided with a top cover having at least one access opening to a storage space, wherein the lid is configured to close the at least one access opening in the cap and swivelable about a central axis of rotation, which projects substantially perpendicularly to a plane of the access opening. The invention also relates to a method of manufacturing the package.
