Abstract (en)
[origin: WO2013124418A1] A handle (50) for affixing to a container having a side-wall (5) and a top (10) joined together by a seam (15), in which the handle (50) has a grip (60) adapted to be held by a user, an attachment ring (70) designed to fit around the top (10) of the container, a main clip (75) aligned with the grip 60 and a retention clip (80) positioned 180 degrees from the grip (60). The handle (50) clips onto the container seam (15) in a robust, but easily detachable fashion and allows a user to hold the container continuously regardless of whether the contents of the container is hot or cold.
