Abstract (en)
[origin: WO2013075160A1] The invention relates to a noise reduction device (1) for arrangement on a traffic route, comprising at least one base element (7) and at least one wall element (8), the base element (7) having an upper side (9) and an underside (15) and the wall element (8) being arranged on the upper side (9) of the base element (7). The underside (15) of the base element (7) is directed at an angle (16) that is inclined relative to the horizontal line.
