Abstract (en)

[origin: WO2013123541A2] The invention relates to a method for transmitting and displaying images (3) on at least one mobile telephone (2) and for determining the frequency with which individual images (3) are displayed with the mobile telephone (2), wherein the images (3) are provided by a server (1) which has a data connection to the mobile telephone (2) via a mobile radio network, and wherein the mobile telephone (2) is changed to an inactive state (30) after a predefined time of non-use (23) or by the input of a user command (23), wherein the mobile telephone (2) is changed from the inactive state (30) to a locked active state (31) when carrying out an activation operation (21) and the mobile telephone (2) is changed from the locked active state (31) to an unlocked active state (32) when carrying out an unlocking operation (22), wherein the mobile telephone (2) accepts user inputs only in the unlocked active state, wherein the server (1) selects a number of images (3) and transmits these images (3) to the mobile telephone (2), one of the images (3) transmitted from the server (1) to the mobile telephone (2) is selected and is kept available for display, the selected image (3) is displayed by the mobile telephone (2) during the locked active state (31) of the mobile telephone (2), and a count value is determined for each of the images (3) transmitted from the server (1) to the mobile telephone (2) and indicates how often the particular image (3) has been displayed on the mobile telephone (2), and the particular count value for each of the images (3) is transmitted from the mobile telephone (2) to the server (1).
