Abstract (en)  
A vacuum cleaner (100), in which a handle (150) installed at a main body (110) is rotated and is folded, and the direction and the length of the handle (150) are adjusted according to a user's physical condition or a cleaning environment so that the vacuum cleaner (100) can be conveniently used, the vacuum cleaner (100) including: a main body (110); a first support part (130) and a second support part (140) that are installed at an outer side of the main body (110) and are spaced apart from each other by a predetermined distance; and a handle (150) combined between the first support part (130) and the second support (140) part, wherein one end of the handle (150) is pivotably installed at the first support part (130), and the other end of the handle (150) is detachably installed at the second support part (140).
