Abstract (en)

[origin: WO2013127952A1] The invention relates to an emergency power supply device (200) for an electromotive furniture drive (100) of a piece of furniture (1), comprising a housing in which at least one energy accumulator is arranged, a connection cable having at least two power lines and several auxiliary lines for connecting to the electromotive furniture drive which is to be associated therewith, a socket for connecting a control unit of the electromotive furniture drive which is to be associated therewith, at least one control element which, when actuated, electrically connects the electric connections of the at least one energy accumulator to the at least two power lines of the connection cable. The housing is designed as a shell housing comprising securing sections and an inner compartment for receiving the at least one energy accumulator, said at least one control element and at least one night light. The invention also relates to an electromotive furniture drive (100) and a piece of furniture (1).
