Abstract (en)  
[origin: WO2013128122A1] The invention relates to a nursing bottle kit including at least one first and one second nursing bottle, each of said nursing bottles comprising a container bottom portion (110, 210) and a sealing portion (120, 220), the container bottom portion extending in an extension direction (Z) from a sealed end to an open end, and being designed to be removably attached to the open end of the container bottom portion (110, 210). The open end of the container bottom portion (110) of the first nursing bottle has a cross-sectional area that is larger than the maximum cross-sectional area of the container bottom portions (210) of the other nursing bottles, and the first nursing bottle encloses the container bottom portions (210) of the other nursing bottles entirely, when the sealing portion (120) of the first nursing bottle is attached to the open end of the container bottom portion (110) of the first nursing bottle.
