Abstract (en)  
[origin: US2015000033A1] A water outlet fitting having a base, a hose device with a hose and a water outlet head as well as a holding device including: a mounting portion for mounting the holding device on the base of the water outlet fitting; a locking portion on the free end of the holding device for producing detachable locking of the hose device; and a guide portion for connecting the locking portion to the mounting portion and provide a contact face for the hose device; wherein in a first handling variant the hose device is locked on the holding device, wherein in a second handling variant the hose device is removed from the holding device and is movable in relation to the holding device, and a corresponding holding device. The water outlet fitting has an operating element which is developed in the manner of a stirrup-shaped handle surrounding the water outlet and/or base.
