Abstract (en)

[origin: WO2013132459A1] A device for moving at least one rotary sprayer 5 for washing or drying appliances, which is adapted to rotate about a first axis "R". The movement device comprises an arm 3 enabled to rotate about a second axis "Z", on which said rotary sprayer 5 is rotatably mounted; at least one actuating device 2, adapted to rotate said arm 3 about said second axis Z. Said arm is adapted to rotate by 360°, is asymmetric, and comprises a single rotary sprayer 5 mounted in the proximity of a peripheral portion of the same arm 3. Said actuating device 2, connected at a coupling portion 32 of the arm 3, selectively rotates the same arm 3 in order to position said rotary sprayer 5 at desired angles of rotation of the arm 3 about said second axis "Z".
