Abstract (en)
[origin: CA2866310A1] The invention relates to a road finishing machine comprising a chassis (2) supporting a driver's cab (1), an undercarriage (3), at least one drive unit (4), a hydraulic system, a screed (5), an asphalt supply arrangement comprising a supply hopper (6) and a longitudinal conveying device conveying from the supply hopper (6) to a cross-distributor (7), and a vapour extraction means (10) operated by a fan and comprising at least one airflow path (X), the extraction line (11) of which has a suction opening (12) above the cross-distributor (7) and an outlet opening (18) at a height above the driver's cab (1), wherein the fan (13) is arranged in the area of the suction opening (12) for the extraction line (11) in the at least one airflow path (X).
