Abstract (en)  
[origin: WO2013131666A1] The invention relates to a hand machine tool insertion tool (12) for an oscillating and/or rotating movement when coupled to a tool receptacle (10, 110, 210), having a processing region (76) and having a fastening region (80) for coupling to the tool receptacle (10, 110, 210) and in which at least two fastening elements (74) are arranged around a circle (82) around a drive axis (84). According to the invention, the fastening region (80) is at least substantially free of recesses in a radial direction (30) within the circle (82).
