Abstract (en)

[origin: WO2013131199A1] The invention relates to a fastening device for an anti-skid chain (3), said device comprising a washer (23) having a clamping device (25) arranged thereon. The clamping device (25) is designed to draw a tension element (27) through a bore (31) lying at radial distance from the centre of the washer (23). The end of the tension element (27) is attached to a wheel bolt and draws the washer (23) towards the anti-skid device (3), wherein the tensile force of the tension element (27) runs axially with respect to the wheel bolt.
