Abstract (en)

[origin: WO2013136099A1] Toilet flusher encompasses tank (1) with cleaning and disinfection products in the shape of balls (6) which is filled through tank neck (1) or neck extension thread (11), on which plug (3) and rubber gasket (4) are located. Neck extension (11) is fixated with connecting nut (10) neck extension (11) and rubber ring (9) of connecting nut (10). Neck extension (11) can be adapted to any toilet flusher by cutting. Realising water from the flusher (2) one part of water enters in the tank goes over cleaning products and sends the collected solution back to the flusher and to the toilet for cleaning the entire toilet surface.
