Abstract (en)
[origin: WO2013131858A1] A lighting device (10), for example for road lighting, comprises: - a channel-shaped housing (14) having two ends (14a) with a main axis (X14) of the housing extending between said ends (14a), - a pair of mounting fixtures (16) for mounting a pair of light radiation sources (12), for example LED light radiation sources, within the housing (14), said light radiation sources radiating light radiation in opposite directions along the main axis (X14) of the housing, and - a pair of reflectors (18) each facing one of the mounting fixtures (16) to receive the light radiation from the sources (12) along said main axis (X14) and reflect it to the outside of the housing (14).
