Abstract (en)
[origin: CN203400087U] A dust collector comprises: a dust collecting barrel used to collect the dust waste, and a button device arranged on the dust collecting barrel and used for locking the dust collecting barrel into the dust collector, wherein the button device is a button seat adhered on the outer wall of the dust collecting barrel, and the dust collecting barrel can be disassembled or assembled by users through the button seat. By the design, the button seat simultaneously has the function of the button and the function of a handle, so as to facilitate the user to operate the dust collecting barrel and make the whole structure design of the dust collecting barrel more reasonable and beautiful.
