Abstract (en)

The present invention refers to a security device connectable to a European cylinder lock. The device comprises a security escutcheon (105; 205) that includes an opening (110; 210) suitable to allow the passage of the cylinder (101; 201; 301) and a security complementary body (106; 206; 306) suitable to be made integral with the cylinder (101; 201; 301). The security complementary body (106; 206; 306) is couplable to the security escutcheon (105; 205), jointly with the cylinder (101; 201; 301), in a recessed housing (107; 207) having a shape complementary to the security complementary body (106; 206; 306).
