Abstract (en)

[origin: EP2639166A1] The device has a shrink frame (3) surrounding the goods stack (2) while shrinking a shrink film (1) and movable at the goods stack. The shrink frame has multiple heating units (4) for heating the shrink film for the shrinking process. The heating units are distributed over the periphery of the shrink frame. A cover plate (6) covering the goods stack is provided, which is arranged with a distance to the upper side (7) of the goods stack during the shrinking process. Side walls (11) are provided below the cover plate and extends along the goods stack. An independent claim is included for a method for the shrink coating of a shrink film on a goods stack.
