Abstract (en)  
An elevator system comprising an elevator cabin guided by or around one or more substantially rigid guiding elements, a travelling cable for supplying energy to the elevator cabin, and a pulley mounted on a pulley frame, wherein the pulley with the pulley frame are movably suspended on the travelling cable, wherein the system further comprises one or more transverse elements each having one end attached to the pulley frame and the other end adapted to be slidably arranged with respect to one or more of the rigid guiding elements. A wind turbine comprising such an elevator system is further described.
