Abstract (en)

[origin: EP2826916A1] The invention refers to a dryer structure for a pulp making process. The dryer structure comprises a compact dryer unit, means (33, 34) for supplying air to the bottom part (23), and means (31) for exhausting air from the exhaust part (21). The compact dryer unit consists of an integrated exhaust part (21) on one end side of said dryer unit, a dryer part (22) arranged adjacent to the exhaust part (21), and a bottom part (23) on the opposite end side of said dryer unit. The bottom part (23) is arranged adjacent to the dryer part (22). The invention further refers to a control system for a dryer and a control method for a dryer.
