Abstract (en)
The invention relates to an igniter device (5a) for igniting energetic materials, more specifically to the area of the initiation of munitions, and methods of forming said ignition devices. There is provided an igniter device (5a), for use in an explosive train, comprising a first synthetic polymer layer (4), a second synthetic polymer layer (4a), wherein said first layer (4) and second layer (4a) envelope a portion of an energetic material (3), wherein said synthetic polymer is capable of being sealed (1).
