Abstract (en)

[origin: WO2013077753A2] The invention relates to a method for mounting facing slabs to a base, wherein holes are drilled in the base (11), wall plugs (8) are placed in the holes, adjustable distance stabilizers (1a) including a mounting disk (1) and a bolt (2) are screwed in the wall plugs (8), the distance of the mounting disk (1) from the base (11) is adjusted by means of the bolt (2), after which the slabs (12) are mounted to the stabilizers (1a) by means of screws (13). The invention also relates to an adjustable distance stabilizer for mounting slabs to a base, including a mounting disk (1) and a bolt (2) with a lock-nut (4), the mounting disk (1) being mounted at the end of the bolt (2).
